

Main UI

Main Caption Area

Main window function

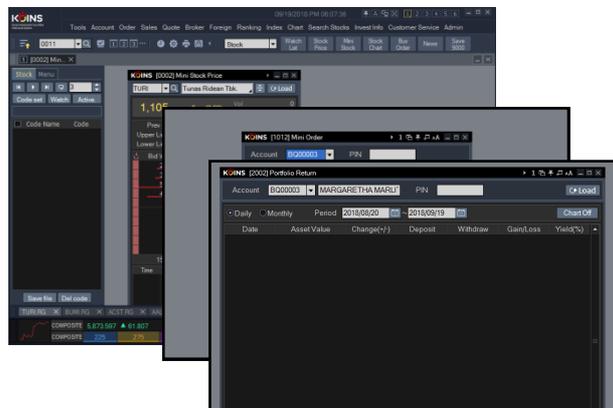

- Function to lock the open screen so that it can not be moved or closed
- To specify the font size of the open screen
- Function to adjust the size of the main window into the entire monitor (in case you use more than one monitor)
- To view widely the hidden screen, such as screen toolbar, navigator bar, ticker bar, etc.

Virtual screen selection

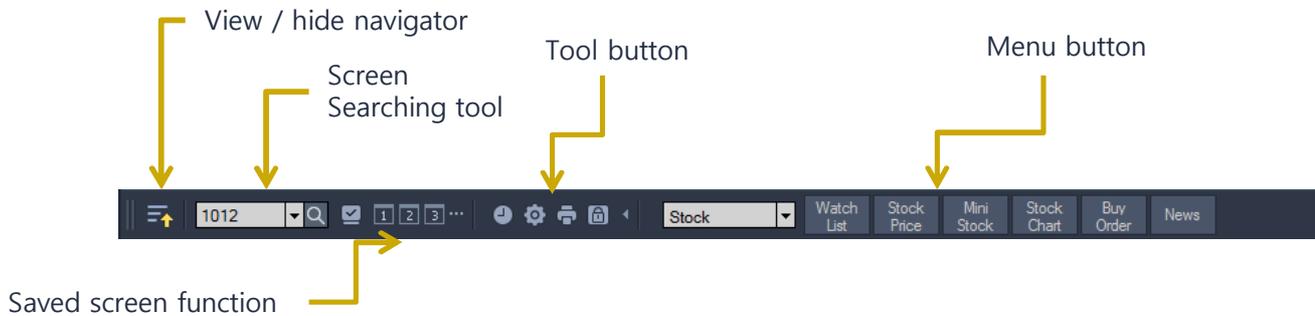

The main window can be used as 6 virtual screens. The selected virtual screen will be displayed on the main window.

Main UI

Screen Toolbar

View/ hide navigator

Function to show or hide the navigator displayed on the left side area of the HTS window

Screen searching tool

Quickly open new screen by entering directly the screen number. Re-select the recently opened screen by clicking the history button. You can search all the menu through this button.

Saved screen function

Function to save the configuration of the open screen. The number will be assigned sequentially once you saved it and if you click the number, you can recall all the configuration you saved.

You can recall the configuration you saved by clicking the related number.

Tool button

To run mini clock

To open setting window and change the setting

To print the running screen as an image

To activate the screen lock function

Menu button Function to run quickly the most frequently used screen or group of menu by register it in advance. You can specify and select the group by market or interests.

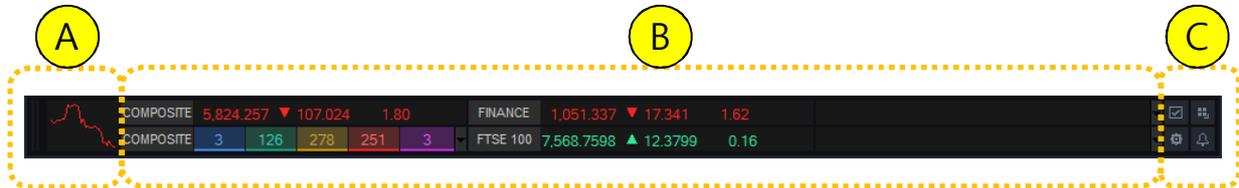

You can divided into several groups.

The configuration of screen, menu group, and saved screen are provided in button form. You can also change the button's name.

Main UI

Ticker Bar

- A Mini chart** Provide today data in the form of 1-minute chart. You can display up to two and each area will display up to 2 index / stock. You can do the setting in setting window.

- B Ticker area** Ticker provides you 5 types of stock data, such as index (domestic/overseas), interest stock quotation, index fluctuation, news, and order conclusion. Stock configuration can be set up to 3 rows x 10 columns, and if it consists only with 1 row then mini chart will not be displayed.

Index/ interest rate

COMPOSITE 5,873.597 ▲ 61.807 1.06

Displaying domestic index/ overseas index/ interest stock rate. If you click the stock then selected stock related window will be opened,

Stock index fluctuation

BASIC-IND 24 25 22

Indicates the number of rising, steady, falling stocks in domestic index. When the stock name on the left side is clicked, the number of the stock will be displayed (can be viewed in ratio as well). Stock also can be displayed according to 5 types: maximum, rising, steady, falling, minimum.

News

Unit Penyertaan Reksa Dana Indeks Simas

Showing most updated news in real time. Click right button to view all the news list and click the item to move to the news page.

Order conclusion

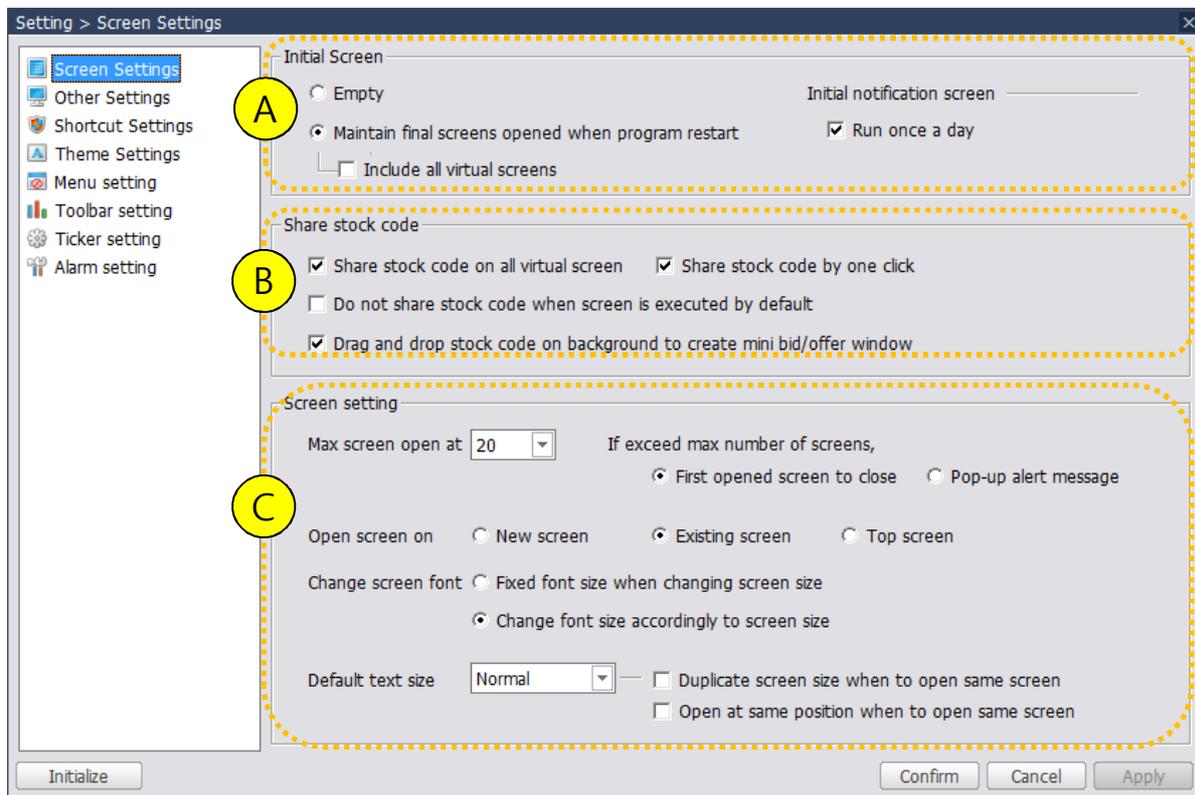

08:34:30 #7 BQ00066 Buy/Cancel Astra Agro Lestari Tbk. Order:3 Lot

Displaying all the orders that has been placed in real time: making order, change order, or cancel order list.

- C Button area**
- Function to display all the order detail.
 - To choose main theme. There are only 2 themes provided: black and white.
 - Open the setting window for stock's ticker configuration.
 - Function to view the alarm activation detail.

Setting – Screen settings

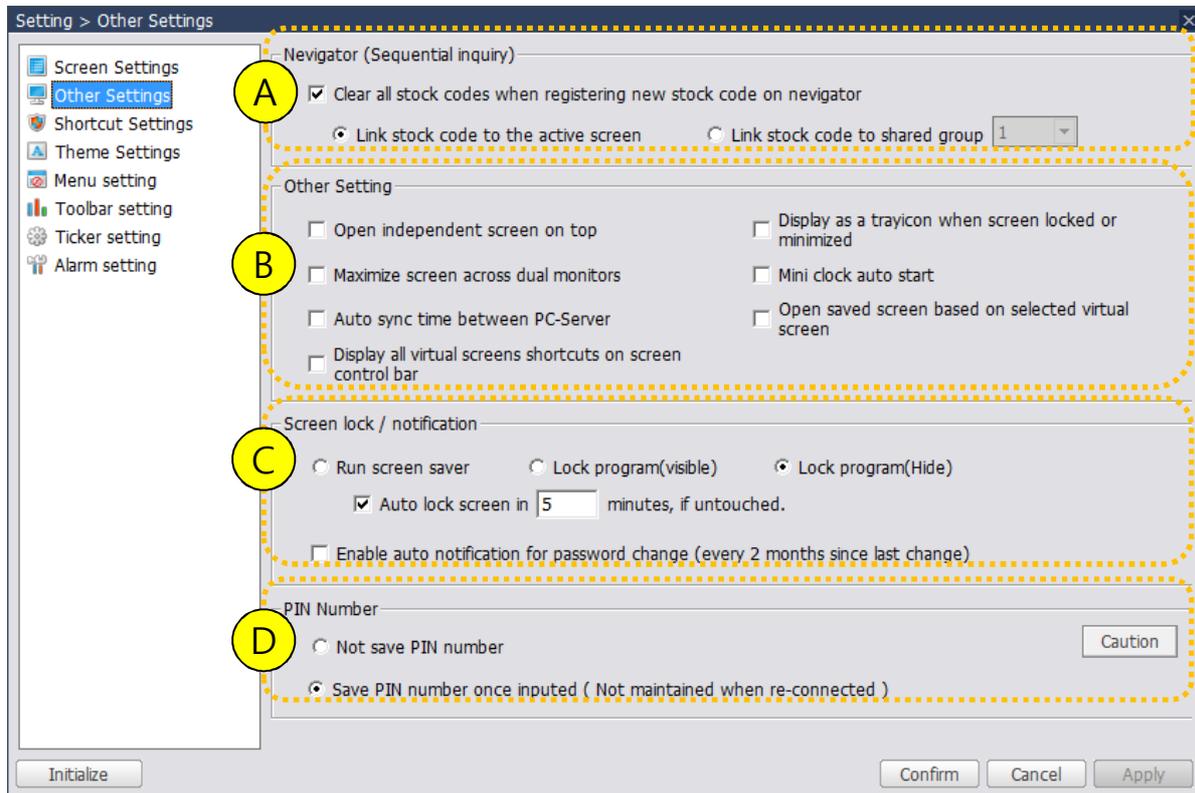

Provides setting features to set up the initial screen, sharing function between screens, and general screen settings.

- A** Set the screen into blank new screen or the last viewed screen when HTS starts. You can also specify if you want to run the initial notification screen once a day.
- B** Setting for linking items to other screens when stock codes are changed on the screen.
Setting to create mini bid/offer window on desktop by drag and drop stock code onto the desktop.
- C** Setting function to specify the maximum number of screen that can be opened on HTS and also to specify action when the number is exceeded.
You can also specify whether to open a new screen or display the existing screen or display the top screen when opening the screen.
When you change the screen size, you can choose whether to keep the font size or to change the font size accordingly.
When you open the screen you can specify the font size. If you have the same screen, you can specify the function that displays the same size and position with the screen.

Setting – Other settings

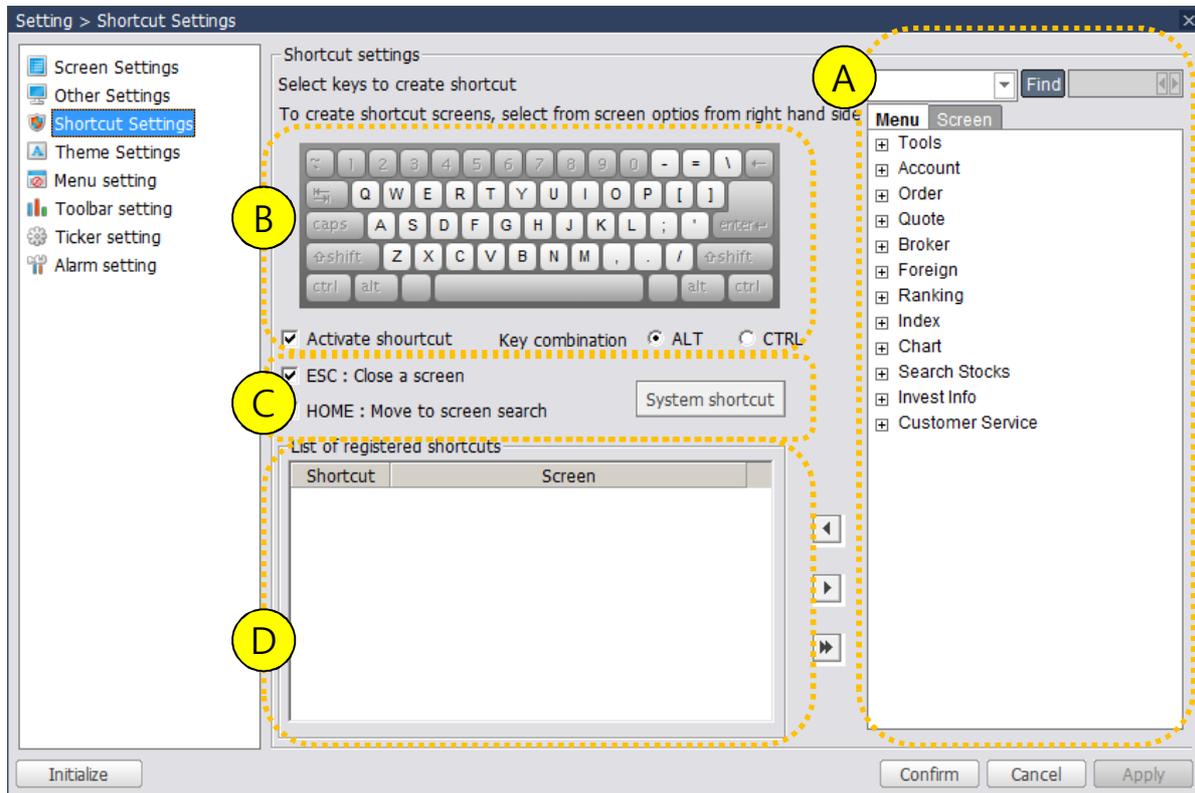

Provides setting features to set up sequential inquiry, HTS other setting, screen lock setting, and PIN number saving option.

- A** Specify whether or not to clear all the stock codes when adding a new stock code on navigator (view stock). And then specify if you want to link the stock code to the active screen or to link the stock code to shared group.
- B** Provides various setting function, such as open independent screen on top, display as a trayicon when screen locked or minimized, auto start the mini clock, auto sync between PC-server, etc.
- C** Specify whether you want to set the screen lock with the screen saver function or visible lock program or hide lock program. You can also set specific time to activate automatic lock screen function.
- D** To set the PIN number saving function where the PIN number will be saved once you use it for an order or other transaction on the account screen. By activate this function, you don't have to input your PIN number on your next transaction on the other screen.

Setting – Shortcut settings

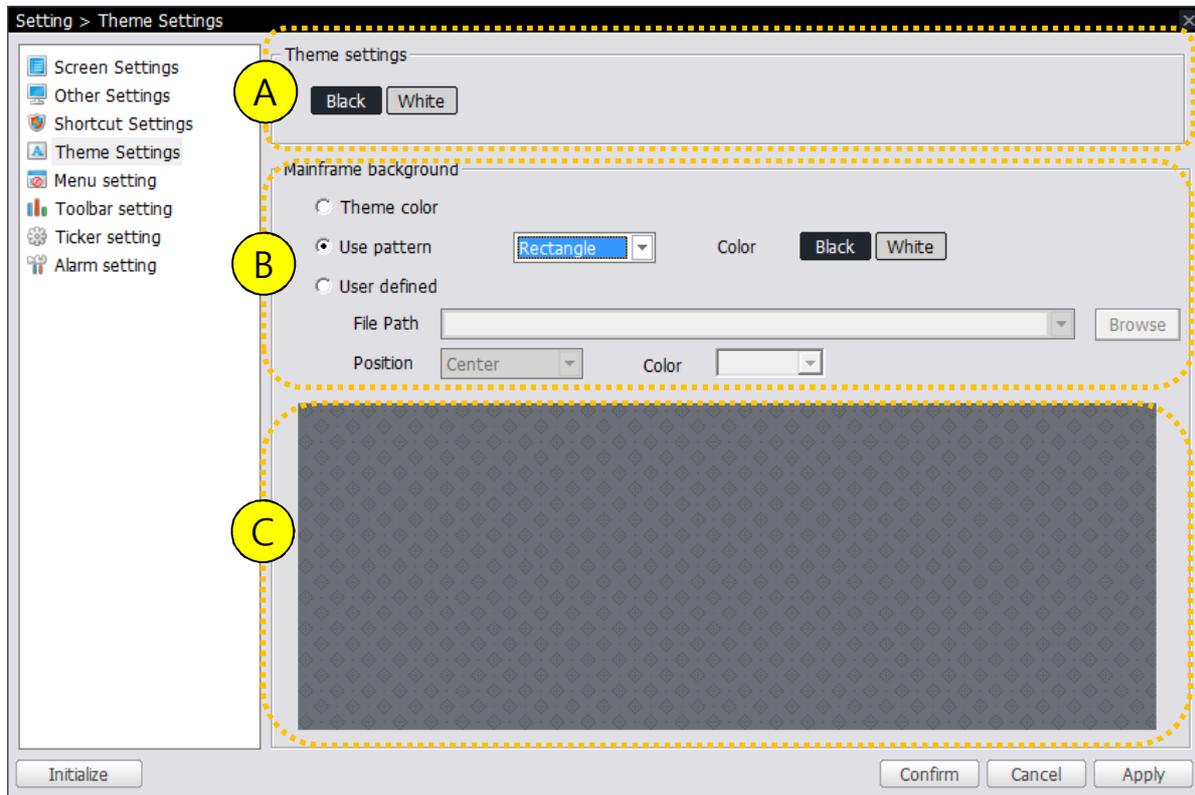

Provides setting features to run screen quickly using the shortcut function on the order screen.

- A** You can choose your desirable screen from the list to create the screen's shortcut key. You can also find the screen right away by typing the screen name on the searching box.
- B** Create your shortcut key by choosing your desirable key from the keyboard. The shortcut then can be made by combining the key with ALT or CTRL.
- C** You can also choose whether to activate the basic shortcut key, such as key ESC for closing screen and HOME key to move to screen search.
- D** Display the list of shortcut key that has been made and saved.

Setting – Theme settings

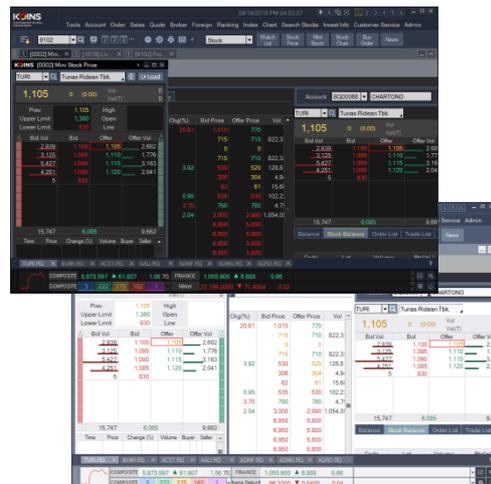

Provides setting features to choose the theme color.

A Specify the whole HTS theme color. You can choose between 2 theme: black or white.

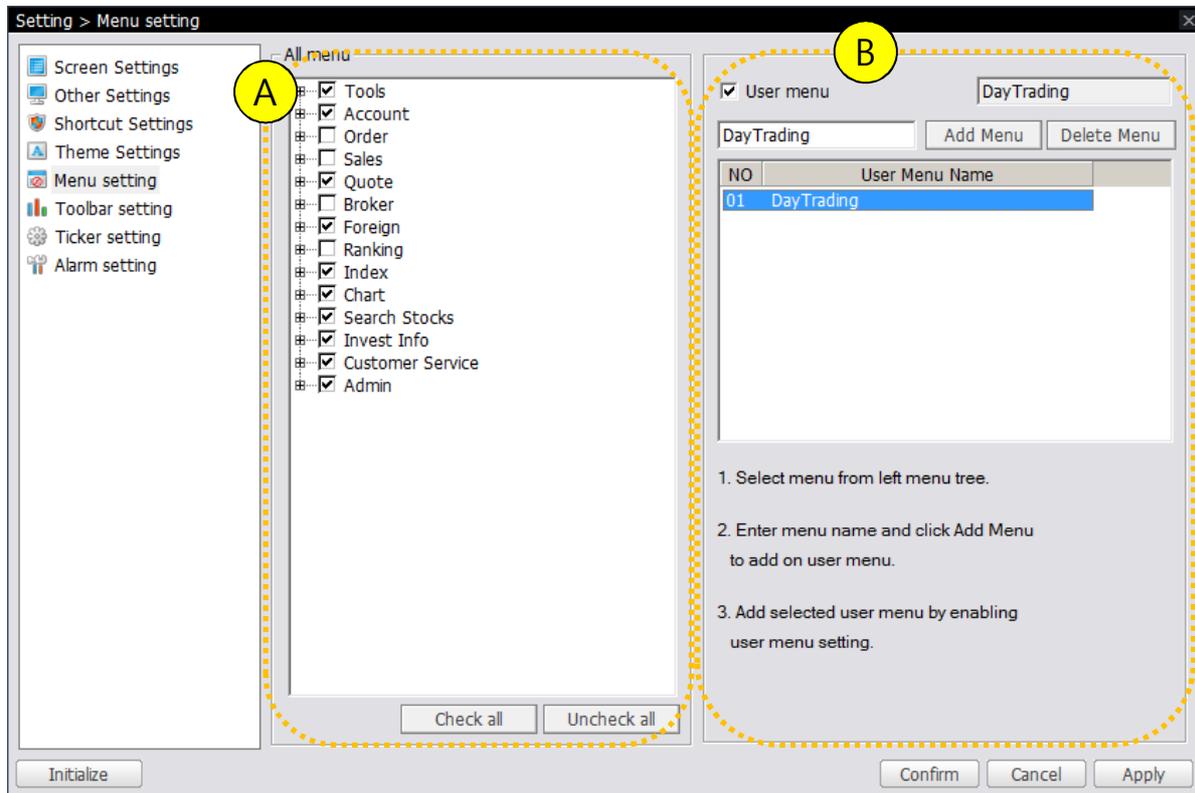

B Specify the background color or image of the HTS. You can choose theme color, specific pattern, or image as a background.

C Provides preview of selected color, pattern, or image for the background.

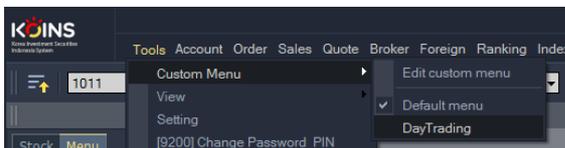

Setting – Menu Settings

Provides setting features to display only selected menu list.

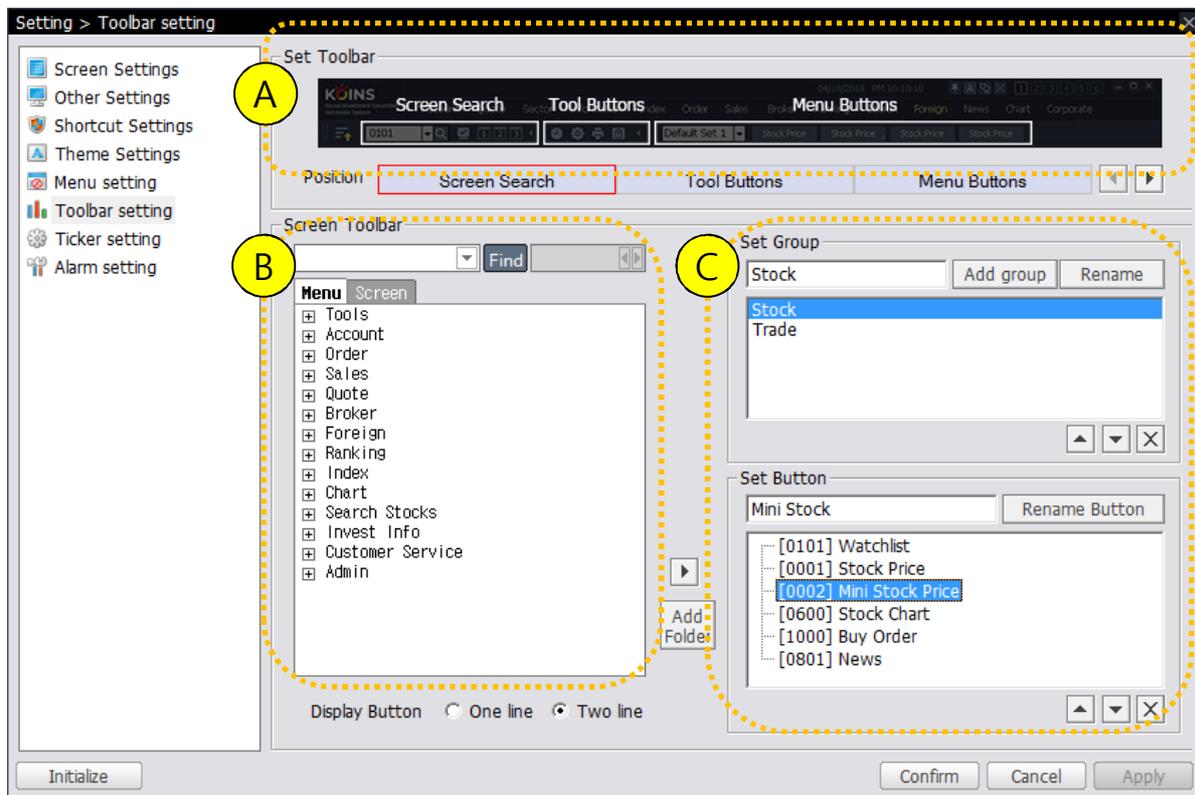

- A** Specify to only display menu item that has been selected from the menu list. You can choose all the menu from the list or just check those which are necessary for you..
- B** Save the new menu list you made and give a name for the list so that you can easily recognize and activate it when you need.

Added user custom menu item: click Tools > Custom Menu and choose the list you want

Setting – Toolbar Settings

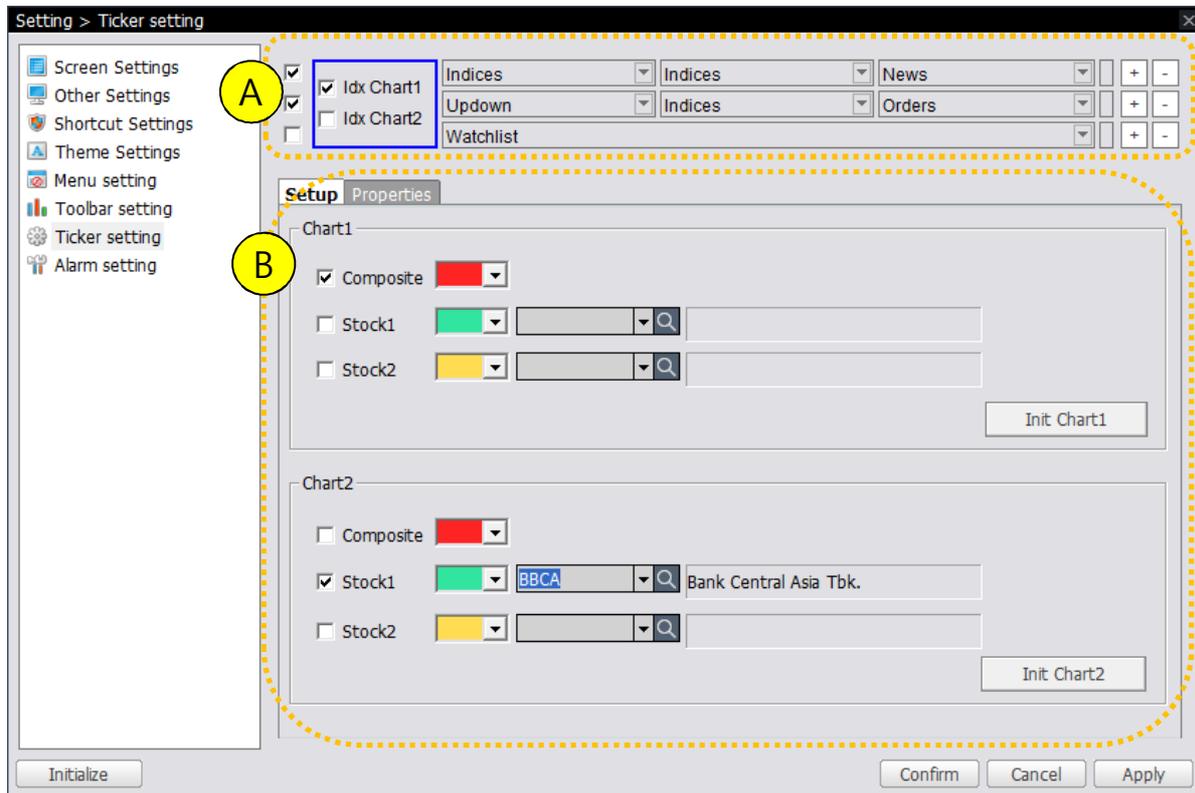

Provides setting features to specify the toolbar order and menu button configuration

- A** Function to set the order of screen toolbar: screen search, tool buttons, menu buttons.
- B** Provides menu search box to ease you find and add the menu to the menu button group.
- C** Provides function to add, delete, rename the menu button group. It displays all the list of menu button group you add. You can also change the order, delete it, or rename the button.

Setting – Ticker Settings

Setting function for ticker area

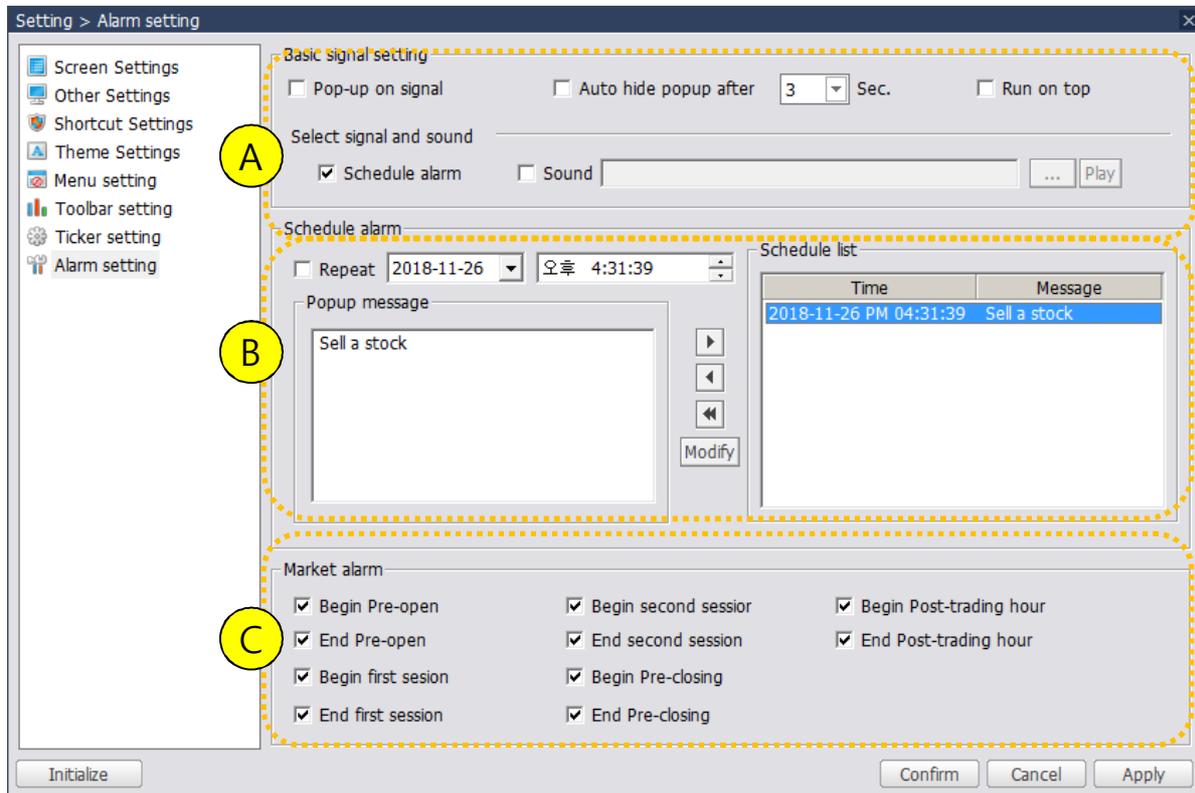

- A** You can make a configuration layout for the stocks displayed on ticker. The number of lines of the stocks displayed on ticker can be specified through the checkbox on the left side. You can specify up to 2 charts and when you click an item, you can specify the rate/ stock for each at the bottom. Other items number can be set in a 3 row x 10 column form. You can also change it by click the item and choose the type of ticker.

+ - Using this button you can add or delete item

- B** Specify the ticker item selected on the above setting. You can choose the stock from domestic / overseas quotation and choose the field you want from the stock information. You can also see the interest stock by choosing the stock from the interest group. You can set to view domestic index fluctuation, the distribution of rising, steady, and falling stocks in graphic form. In terms of news, you can set to get your preferable information from the real-time news updated. You can also set to get the information about your order conclusion based on your preferable type of information, and then choose your desired field item.

Setting – Alarm setting

Provides setting features to set the basic signal you want to receive on HTS and register the schedule.

- A** When you received a signal from the updated news, market operation information, schedule, etc. you will get it on a pop-up list form. On this screen, you can manage the setting function of the pop-up list: auto hide, tun on top, etc.
- B** You can register your schedule and set the alarm for the schedule. The setting for the alarm sound can be made on the sound option above. You can also edit and delete the schedule you made and the signal will be displayed on the pop-up list according to the time you set.
- C** You can specify your preferable information about market operation information you want to received. The alarm will be displayed according to the time you set.

116	13,050	13,300	254
22	13,025	13,325	46
418	13,000	13,350	49
23	12,975	13,375	190
294	12,950	13,400	140
751	12,900	13,425	22
2,657	1,518		1,139

③ Order inquiry

- Date / Time : order date/ order time
- Order# : order number
- Code : stock code
- B/S : buy/ sell
- Order Price / Vol : order price/ order volume
- Done Price / Done Vol : order done price/ done volume
- Result : order processing state
- Done Time : order done time
- Valid Date : valid date for the setting

④ Setting area will not be active if you choose Order List tab as shown in the picture.

3.2. Add Buy Order / Add Sell Order

The first screenshot shows the 'Automatic Order Setting' window with the 'Add Buy Order' button highlighted by a yellow circle with the number 1. The 'Order List' table is visible below.

Clear	On	Code	Vol	Avg	Ptsl(+/-)	Last	Chg	B/S	Setting Condition	Vol	Order Price	Valid Date	Result	
X		BUMI	100	100	1,260,000	226	▲	2	P.Sell	Loss >= Tick1,000	10%	Last Prc	2018/08/28	Off
X		BUMI	100	100	1,260,000	226	▲	2	P.Sell	LastPrc <= Rp1,000	10%	Last Prc	2018/08/31	Rejected
X		BUMI	100	100	1,260,000	226	▲	2	P.Sell	LastPrc <= Rp230	10%	Last Prc	2018/08/24	Rejected
X		ACES				1,380	▲	30	Sell	Last Prc >= 1,390	10Rp	Last Prc	2018/08/31	Rejected
X		BUMI				226	▲	2	Buy	Last Prc >= 223	100Lot	Last Prc	2018/08/31	Rejected

The second screenshot shows the 'Stock 종목안내창' (Stock Search) window with a yellow circle and the number 3 highlighting the search results list. The list includes various stocks such as AALI, ABBA, ABDA, etc.

The third screenshot shows the 'Automatic Order Setting' window with a yellow circle and the number 2 highlighting the 'Order List' table. The table now shows a new 'Buy' order for 'ABDA'.

Clear	On	Code	Vol	Avg	Ptsl(+/-)	Last	Chg	B/S	Setting Condition	Vol	Order Price	Valid Date	Result
X		ABDA				6,900		Buy				2018/08/28	
X		BUMI	100	100	1,240,000	224		P.Sell	Loss >= Tick1,000	10%	Last Prc	2018/08/28	Off
X		BUMI	100	100	1,240,000	224		P.Sell	LastPrc <= Rp1,000	10%	Last Prc	2018/08/31	Rejected

- ① Click Add Buy Order / Add Sell Order button
 - Add Buy / Sell setting line at the top of watchlist
- ② Click on the stock control of the added row to invoke the stock search window
- ③ Select stock from the search window to reflect the stock in the setting and update the price information. (number 2 is default state where the stock name and price information are still empty).

3.3. Add Sell Order -> P.Sell Order

: P.Sell Order is set by adding the Sell Order by clicking the Add Sell Order as follows and selecting the target stock from the pop-up balance screen using the "P" button.

The screenshots illustrate the following steps:

- Step 1:** The user clicks the "Add Sell Order" button in the top toolbar of the "Automatic Order" window.
- Step 2:** A "Wide Order - Select Portfolio" pop-up window appears, showing a list of stocks. The user selects "BUMI" (Bumi Resources Tbk) by clicking the "P" button in the "Code" column.
- Step 3:** The "Automatic Order" window is updated. A new line is added to the "Order List" table for "BUMI" with order type "P.Sell". The "Setting" column for this line is expanded to show configuration options for "P.SELL - Bumi Resources Tbk", including "Setting Type" (Last Prc), "Setting Condition" (Last Prc <= Rp), "Volume" (Avl Lot 1 %), and "Order Price" (Last Prc).

- ① Add the Sell Order setting line by clicking the Add Sell Order button
- ② Summon the pop-up Portfolio by clicking the "P" control button on the added line
- ③ When you select the balance on pop-up Portfolio, the stock will be displayed on the setting and balance and market price information will be updated
(stock name, balance, and market price information will be empty on default state as per shown on image 2)

* Selected order type of the stock that has been set can not be changed

3.4. Buy Order Setting / Sell Order Setting

- : Area to check on monitoring condition, order volume, and order price
- : Buy Order Setting and Sell Order Setting composition is identical

BUY - Asuransi Bina Dana Arta Tbk.

4 Valid Date

1 Setting Condition	2 Volume	3 Order Price
<input checked="" type="radio"/> Last Prc >= 7,075 <input type="radio"/> Volume >= 1	<input checked="" type="radio"/> 10 Lot <input type="radio"/> Rp equivalent to amount	<input checked="" type="radio"/> Last Prc <input type="radio"/> Rp

- ① Setting Condition
 - a. set the monitoring condition.
 - b. you can only choose one to set the monitoring condition by price or volume.
 - c. price standard setting
 - price type combo selection : Last Prc / Best Offer / Best Bid (chosed one)
 - comparison combo option : Over/ Under (choose one)
 - Price standard input control : input the price standard
 - d. Volume standard setting
 - Volume standard input control: input the order volume standard
 - ② Volume
 - a. set the order volume.
 - b. Set the volume by Lot or by Rp unit (choose one)
 - Lot unit setting: execute the order on inputted Lot unit
 - Rp unit setting: execute the order according to volume after being calculated by inputted Rp unit.
 - ③ Order Price
 - a. To set order price.
 - b. Select one from the price type available or input directly.
 - c. Price type : Last Price, Best Offer, Best Bid, Offer + 1 ~ 4, Bid - 1 ~ 4
 - ④ Valid Date
 - a. To specify valid date of the setting.
 - b. You can choose from 1 day ~ 30 days (basic : 1 day)
- After saving the setting and run the monitoring function, the order will be executed according to server logic in which when the closing price fit the setting condition that has been set in the Setting Condition, the order will be done with volume set on Volume and price set in the Order Price.

3.5. P.Sell Order Setting

: When you choose the stock balance and set it, the order will be automatically set according to amount of the balance at the time of setting.

: After finish setting, all the changes in the balance of related stocks will not be reflected on Automatic Order.

P.SELL - Bumi Resources Tbk.

① Setting Type: Last Prc, %, Tick, P/L

⑤ Valid Date: 2018/08/29

② Setting Condition: Last Prc <= Rp, Last Prc >= Rp

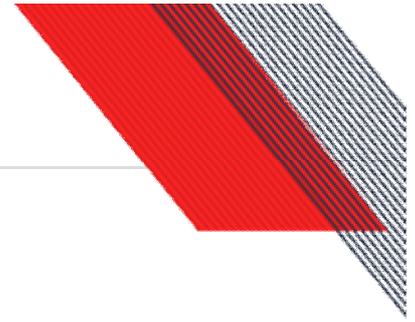

③ Volume: Avl Lot 1 %, 1 Lot, Rp equivalent to amount

④ Order Price: Last Prc, Rp

Save Setting

- ① Setting Type
 - a. Set the standard of monitoring condition.
 - b. Standard
 - Last Prc
 - Best Offer
 - Best Bid
 - % (profit and loss)
 - Tick (profit and loss)
 - P/L (profit and loss)
- ② Setting Condition
 - a. Set the monitoring condition according to standard set on ①
 - b. see reference on 3.5.1
- ③ Volume
 - a. Set the order volume.
 - b. choose one from the volume unit: Avl Lot / Lot / Rp
 - Avl Lot ratio: execute the volume order according to the inputted ratio in compare to the set balance
 - Lot : execute the order according to the inputted Lot unit
 - Rp : executed the order according to the volume calculation equal to the inputted Rp
- ④ Order Price, ⑤ Valid Date

: Same with the Sell / Buy Order Setting screen

3.5.1. Condition of each P.Sell Setting Type

a. Last Prc

- Last Prc \leq Rp entered
- Last Prc \geq Rp entered

b. Best Offer

- Best Offer \leq Rp entered
- Best Offer \geq Rp entered

c. Best Bid

- Best Offer \leq Rp entered
- Best Offer \geq Rp entered

d. % (profit and loss)

- Loss \geq % entered
- Gain \geq % entered

* Server processing logic

- purchase amount = set balance (Vol) * purchase average unit price (Avg) * Lot
- Current evaluation amount = set balance (Vol) * current price (Last) * Lot
- estimation rate of purchase amount = current evaluation amount / purchase

amount * 100

- Loss (%) : $100 - \text{estimation rate of purchase amount} \geq$ % value entered
- Gain (%) : $\text{estimation rate of purchase amount} - 100 \geq$ % value entered

e. Tick (profit and loss)

- Loss \geq Tick entered
- Gain \geq Tick entered

f. P/L

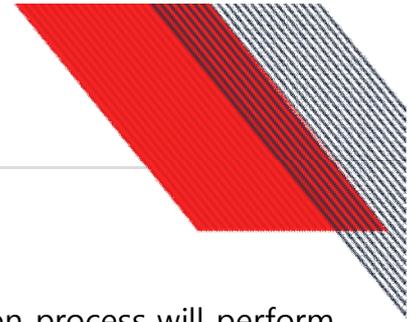

- Loss \geq Rp entered
- Gain \geq Rp entered
- * If you set the purchase average unit price (Avg) as 201 and Loss 2, then the order will be executed when current price (Last) is 199 or less.

3.6. Save Setting

The interface shows the 'Automatic Order Setting' window for account BQ00066 (CHARTONO). The 'BUY - Asuransi Bina Dana Arta Tbk' order is selected. The 'Setting Condition' is configured as 'Last Prc >= 7.075'. The 'Volume' is set to 10 Lot. The 'Order Price' is set to 'Last Prc'. The 'Valid Date' is 2018/08/31. The 'Save Setting' button is highlighted with a yellow circle '2'.

Clear	On	Code	Vol	Avg	Ptsl(+/-)	Last	Chg	B/S	Condition	Vol	Order Price	Valid Date	Result
x		ABDA	P			6,900		Buy				2018/08/28	
x		BUMI	P	100	100	1,240,000	224	P.Sell	Loss >= Tick1,000	10%	Last Prc	2018/08/28	Off
x		BUMI	P	100	100	1,240,000	224	P.Sell	LastPrc <= Rp1,000	10%	Last Prc	2018/08/31	Rejected
x		BUMI	P	100	100	1,240,000	224	P.Sell	LastPrc <= Rp230	10%	Last Prc	2018/08/24	Rejected
x		ACES	P			1,375	▲ 25	Sell	Last Prc >= 1,390	10Rp	Last Prc	2018/08/31	Rejected
x		BUMI	P			224		Buy	Last Prc >= 223	100Lot	Last Prc	2018/08/31	Rejected

- ① monitoring condition, order volume, and order price is set on setting area
- ② save the setting by clicking the Save Setting button
 - * valid date can be set from 1 day ~ 30 days (default: 1 day)
- ③ All the setting will automatically viewed after saving and reflected on setting list and setting area.
 - * Saved setting can not be changed

3.7. All Clear

- To clear all the setting set on selected account
- However, if there is any under monitoring setting, the notification process will perform and let the user to take a consideration for awhile before execute it.

* To clear the setting one by one, you can click the "X" button on the clear column of the grid.

3.8. All Run / All Stop

- All Run : Change the monitoring condition of the selected account from "Off" to under monitoring batch ("On").
- All Stop : Change the monitoring condition of the selected account from "On" to "Off" (stop all monitoring batch).
- However, if there is any under monitoring setting, the notification process will perform and let the user to take a consideration for awhile before execute it.

* To execute Run/Stop command one by one, you can click Check control on the On column.

3.9. Attention

- Screen related attention pop-up message

The screenshot shows the KOINS [1021] Order Booking interface. It includes the following elements:

Nonregular Order

The image displays two screenshots of the KOINS [1031] Nonregular Order interface. The left screenshot shows the 'BUY' screen with fields for Code (ABBA.TN), Board (Cash Market), Price (151), and Vol (2). The right screenshot shows the 'AMEND' screen with an 'Order#' field highlighted by a yellow circle with the number 1. Below these is a 'Select Open Order' table showing an open order for WOOD with a price of 494.

Order ID	Code	B/S	Open Vol	Done Vol	Total Vol	Order Price	Value	Status	Mkt
20001	WOOD	Buy	1		1	494	49,400	Sending	RG

- A** Account and PIN area: Select account for the ID you log in and input your PIN number.
- B** Order area: only available to send order command for Cash Market. (if select Regular, Nonregular Market only available to view)
B-1 Order# button: no closing order status will open the TN order pop-up window. If you double click the detail, it will send you to Amend and withdraw screen.
